

Computer Programming (I)

Homework 6

Problem Statement

In the following program, please replace the comments by code so that the outputs are 7 and 5, in that order:

```
#include <iostream>
using namespace std;

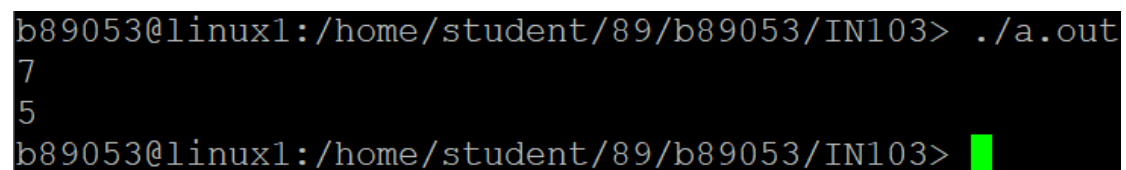

void mySwap( int *a, int *b ) { /* replace this comment by anything */ }

int main()
{
    int a = 5;
    int b = 7;

    mySwap( /* replace this comment by anything */ );
    cout << a << '\n' << b << '\n';
}
```

Please do not call std::swap.

My Screenshot

```
b89053@linux1:/home/student/89/b89053/IN103> ./a.out
7
5
b89053@linux1:/home/student/89/b89053/IN103> █
```
